# TABLE OF CONTENTS

## to Volume 78, September–December, 1974

ABRAHAM, IRENE and JOHN C. LUCCHESI, Dosage compensation of genes on the left and right arms of the *X* chromosome of *Drosophila pseudoobscura* and *Drosophila willistoni* ..... 1119–1126

ADLER, PAUL N. and CHARLES E. HOLT, Genetic analysis in the Colonia strain of *Physarum polycephalum*: heterothallic strains that mate with and are partially isogenic to the Colonia strain ..... 1051–1062

*AMES, BRUCE N., A combined bacterial and liver test system for detection and classification of carcinogens and mutagens ..... 91–95

*AUERBACH, CHARLOTTE, Chairman's remarks, Symposium 2: Mutagenesis ..... 77–79

*BAKER, WILLIAM K., Mechanisms of chromosomal and gene inactivation in Drosophila 333–341

BARKER, J. S. F. and L. J. E. KARLSSON, Effects of population size and selection intensity on responses to disruptive selection in *Drosophila melanogaster* ..... 715–735

*BEISSON, J., G. H. BEALE, J. KNOWLES, A. SAINSARD, A. ADOUTTE and A. TAIT, Genetic control of mitochondria in paramecium ..... 403–413

BERGER, EDWARD M., Esterases of Drosophila. II. Biochemical studies of Esterase-5 in *D. pseudoobscura* ..... 1157–1172

BERGER, EDWARD M. and LEE WEBER, The ribosomes of Drosophila. II. Studies on intraspecific variation ..... 1173–1183

*BERLOWITZ, LAURENCE, Chromosomal inactivatison and reactivation in mealy bugs... 311–322

BRUNS, PETER J. and TRUDY B. BRUSSARD, Positive selection for mating with functional heterokaryons in *Tetrahymena pyriformis* ..... 831–841

*CARLSON, ELOF AXEL, Editor's note ..... 5–6

*CARTWRIGHT, T. C., Net effects of genetic variability on beef production systems..... 541–561

*CHANDRA, H. SHARAT and SPENCER W. BROWN, Regulation of *X*-chromosome inactivation in mammals ..... 343–349

*CHU, ERNEST H. Y., Induction and analysis of gene mutations in cultured mammalian somatic cells ..... 115–132

*CHURCH, R. B., Chairman's remarks, Symposium 7: Developmental genetics ..... 351–354

*CHURCH, R. B., Molecular and reproductive biology in animal genetics ..... 511–524

*CLARK, ALVIN J., Progress towards a metabolic interpretation of genetic recombination of *Escherichia coli* and bacteriophage lambda ..... 259–271

COPELAND, JAMES C., The *Bacillus subtilis* genome: Replication-order and map-position discrepancies—evidence for a second origin ..... 1015–1034

*DAWID, IGOR B., IVAN HORAK and HAYDEN G. COON, The use of hybrid somatic cells as an approach to mitochondrial genetics in animals ..... 459–471

*DE WET, J. M. J. and J. R. HARLAN, Tripsacum-maize interaction: a novel cytogenetic system ..... 493–502

DOONER, H. K. and J. L. KERMICLE, Reconstitution of the $R^r$ compound allele in maize 691–701

*DUJON, B., P. P. SLONIMSKI and L. WEILL, Mitochondrial genetics IX: A model for recombination and segregation of mitochondrial genomes in *Saccharomyces cerevisiae* ..... 415–437

EFRON, Y., An EMS-sensitivity factor in maize conditioning albino leaf stripes..... 859–867

ELY, BERT, Physiological studies of Salmonella histidine operator-promoter mutants.. 593–606

ELY, BERT, DAVID B. FANKHAUSER and PHILIP E. HARTMAN, A fine structure map of the Salmonella histidine operator-promoter ..... 607–631

*ESPOSITO, MICHAEL S. and ROCHELLE E. ESPOSITO, Genes controlling meiosis and spore formation in yeast ..... 215–225

FALKINHAM, JOSEPH O. III and A. J. CLARK, Genetic analysis of a double male strain of *Escherichia coli* K12 ..... 633–644

FELSENSTEIN, JOSEPH, The evolutionary advantage of recombination ..... 737–756

*Firtel, Richard A., Allan Jacobsen, Jessica Tuchman and Harvey F. Lodish, Gene activity during development of the cellular slime mold *Dictyostelium discoideum* ..... 355–372

*Frankel, Otto H., Genetic conservation: our evolutionary responsibility ..... 53–65

Gelbart, William M., Margaret McCarron, Janardan Pandey and Arthur Chovnick, Genetic limits of the xanthine dehydrogenase structural element within the rosy locus in *Drosophila melanogaster* ..... 869–886

Gethmann, Richard C., Meiosis in male *Drosophila melanogaster*. I. Isolation and characterization of meiotic mutants affecting second chromosome disjunction ..... 1127–1142

*Gillham, Nicholas W., John E. Boynton and Robert W. Lee, Segregation and recombination of non-mendelian genes in Chlamydomonas ..... 439–457

Gleason, Mary K. and Robert L. Metzenberg, Regulation of phosphate metabolism in *Neurospora crassa*: Isolation of mutants deficient in the repressible alkaline phosphatase ..... 645–659

*Green, Ronald R. and John W. Drake, Misrepair mutagenesis in bacteriophage T4 ..... 81–89

Haber, James E., Bisexual mating behavior in a diploid of *Saccharomyces cerevisiae*: Evidence for genetically controlled non-random chromosome loss during vegetative growth ..... 843–858

Harford, A. Gayler, Ribosomal gene magnification in Drosophila: A chromosomal change ..... 887–896

*Harlan, J. R. and J. M. J. De Wet, Sympatric evolution in sorghum ..... 473–474

Hedrick, Philip W., Genetic variation in a heterogeneous environment. I. Temporal heterogeneity and the absolute dominance model ..... 757–770

*Heiser, Charles B., Jr. and David C. Nelson, On the origin of the cultivated Chenopods (Chenopodium) ..... 503–505

*Holliday, Robin, Molecular aspects of genetic exchange and gene conversion ..... 273–287

*Hotchkiss, Rollin D., Molecular basis for genetic recombination ..... 247–257

Johnson, George B., On the estimation of effective number of alleles from electrophoretic data ..... 771–776

Jones, J. S. and T. Yamazaki, Genetic background and the fitness of allozymes ..... 1185–1189

Kahan, Brenda, Karsten R. Held and Robert DeMars, The locus for human adenine phosphoribosyltransferase on chromosome No. 16 ..... 1143–1156

*Kimber, Gordon, A reassessment of the origin of the polyploid wheats ..... 487–492

*Knowland, John, Protein synthesis directed by the RNA from a plant virus in a normal animal cell ..... 383–394

*Kondo, Sohei, Radiation genetics in microorganisms and evolutionary considerations 149–161

Langley, Charles H. and James F. Crow, The direction of linkage disequilibrium ... 937–941

Langley, Charles H., Yoshiko N. Tobari and Ken-Ichi Kojima, Linkage disequilibrium in natural populations of *Drosophila melanogaster* ..... 921–936

*Levins, Richard, Genetics and hunger ..... 67–76

*Lifschytz, E. and D. L. Lindsley, Sex chromosome activation during spermatogenesis ..... 323–331

Lu, B. C., Genetic recombination in Coprinus: IV. A kinetic study of the temperature effect on recombination frequency ..... 661–677

*Lyon, Mary F., Chairman's remarks, Symposium 6: Gene and chromosome inactivation ..... 305–309

*Maynard Smith, J., Recombination and the rate of evolution ..... 299–304

Milkman, Roger and Rodney R. Zeitler, Concurrent multiple paternity in natural and laboratory populations of *Drosophila melanogaster* ..... 1191–1193

Miller, D. A., V. G. Dev, R. Tantravehi, O. J. Miller, M. B. Schiffman, R. A. Yates and S. Gluecksohn-Waelsch, Cytological detection of the $c^{25h}$ deletion involving the albino (*c*) locus on chromosome 7 in the mouse ..... 905–910

Mukai, Terumi, Ricardo A. Cardellino, Takao K. Watanabe and James F. Crow, The genetic variance for viability and its components in a local population of *Drosophila melanogaster* ..... 1195–1208

Nagylaki, Thomas, Genetic structure of a population occupying a circular habitat ... 777–790

*Neel, James V., On emphases in human genetics ..... 35–40

NETTER, PIERRE, ERIC PETROCHILO, PIOTR P. SLONIMSKI, MONIQUE BOLOTIN-FUKUHARA, DARIO COEN, JEAN DEUTSCH and BERNARD DUJON, Mitochondrial genetics. VII. Allelism and mapping studies of ribosomal mutants resistant to chloramphenicol, erythromycin and spiramycin in *S. cerevisiae* ..... 1063–1100

*NICKLAS, R. BRUCE, Chromosome segregation mechanisms ..... 205–213

*OKA, HIKO-ICHI, Experimental studies on the origin of cultivated rice ..... 475–486

*PAINTER, R. B., DNA damage and repair in eukaryotic cells ..... 139–148

*PARKER, D. R. and J. H. WILLIAMSON, Some radiation effects on segregation in Drosophila ..... 163–171

PATHAK, SEN and A. DEAN STOCK, The *X* chromosomes of mammals: Karyological homology as revealed by banding techniques ..... 703–714

PERSON, STANLEY, JOHN ALLEN MCCLOSKEY, WALLACE SNIPES and RICHARD C. BOCKRATH, Ultraviolet mutagenesis and its repair in an *Escherichia coli* strain containing a nonsense codon ..... 1035–1049

PRAKASH, LOUISE, Lack of chemically induced mutation in repair-deficient mutants of yeast ..... 1101–1118

RAPPAPORT, HARRIET, MARJORIE RUSSEL and MILLARD SUSMAN, Some acridine-resistant mutations of bacteriophage T4D ..... 579–592

*RENDEL, JAN, The role of breeding and genetics in animal production improvement in the developing countries ..... 563–575

*RILEY, RALPH, Cytogenetics of chromosome pairing in wheat ..... 193–203

*ROBERTSON, ALAN, Chairman's remarks, Symposium 10: Animal genetics ..... 507–510

ROTHMAN, EDWARD D., CHARLES F. SING and ALAN R. TEMPLETON, A model for analysis of population structure ..... 943–960

RUSSELL, RICHARD L., Comparative genetics of the T-even bacteriophages ..... 967– 988

RUSSELL, RICHARD L. and ROBERT J. HUSKEY, Partial exclusion between T-even bacteriophages; an incipient genetic isolation mechanism ..... 989–1014

*RUSSELL, W. L., Future research in mouse radiation genetics ..... 135–138

*SANDLER, L. and DAN L. LINDSLEY, Some observations on the study of the genetic control of meiosis in *Drosophila melanogaster* ..... 289–297

*SEARLE, A. G., Nature and consequences of induced chromosome damage in mammals 173–186

SELITRENNIKOFF, CLAUDE P., ROBERT E. NELSON and RICHARD W. SIEGEL, Phase-specific genes for macroconidiation in *Neurospora crassa* ..... 679–690

*SHERMAN, FRED and JOHN W. STEWART, Variation of mutagenic action on nonsense mutants at different sites in the iso-1-cytochrome *c* gene of yeast ..... 97–113

SMITHERS, CHARLES M. and PAULINUS P. ENGEL, Gene-enzyme relations of tryptophan mutants in *Streptomyces coelicolor* A3(2) ..... 799–808

SOLIMAN, M. HANI, Repair of *X*-irradiation damage in *Tribolium castaneum* strains selected for differences in developmental rates ..... 897–904

SPIETH, P. T., Gene flow and genetic differentiation ..... 961–965

*STENT, GUNTHER S., The dilemma of science and morals ..... 41–51

*STERN, CURT, Presidential Address: The domain of genetics ..... 21–33

*STERN, HERBERT and YASUO HOTTA, DNA metabolism during pachytene in relation to crossing over ..... 227–235

STODOLSKY, M., Recipient gene duplication during generalized transduction ..... 809–822

STRAUS, DANIEL S., Induction by mutagens of tandem gene duplications in the *glyS* region of the *Escherichia coli* chromosome ..... 823–830

STROBECK, CURTIS, The two-locus model with sex differences in recombination ..... 791–797

*SUTHERLAND, T. M., PATRICIA E. BIONDINI and G. M. WARD, Selection for growth rate, feed efficiency, and body composition in mice ..... 525–540

*TAYLOR, J. HERBERT, Chairman's remarks, Symposium 4: Meiosis ..... 187–191

*URSPRUNG, HEINRICH, Developmental genetics of Drosophila ..... 373–382

VAN AARDE, I. M. R., The effect of linkage on the mean value of inbreds derived from a random mating population ..... 1245–1249

WEIR, B. C., R. W. ALLARD and A. L. KAHLER, Further analysis of complex allozyme polymorphisms in a barley population ..... 911–919

*WHITEHOUSE, H .L. K., Advances in recombination research ..... 237–245

*Whittingham, D. G., Embryo banks in the future of developmental genetics ..... 395–402

*Wolff, Sheldon, Seymour Abrahamson, Michael A. Bender and Alan D. Conger, The uniformity of normalized radiation-induced mutation rates among different species ..... 133–134

Yamaguchi, Osamu and Terumi Mukai, Variation of spontaneous occurrence rates of chromosomal aberrations in the second chromosomes of *Drosophila melanogaster* . . 1209–1221

Zouros, E., C. B. Krimbas, S. Tsakas and M. Loukas, Genic *versus* chromosomal variation in natural populations of *Drosophila subobscura*. appendix by M. Loukas, S. Tsakas, C. B. Krimbas, E. Zouros, E. Diamantopoulou-Panopoulou and V. Alevizos ..... 1223–1244

Asterisks indicate papers from the symposia of the XIII International Congress of Genetics.
